

TIPS AND IDEAS FOR PROGRAMMES FOR CHILDREN

If you decide to organize a school trip in the Kyčerka Resort, we will be pleased to prepare an entertaining and at the same time educating programme for you. Let yourself be inspired by tips and ideas for programmes that will certainly interest and delight the children. And they will be remembering them fondly for a long time.

In Mammoth Hunters' Tracks

You will find yourself in a prehistoric group of the Wallachian people. You will face an everyday fight for your life, ensuring running of the camp, getting food by picking and hunting, starting a fire, distinguishing plants and animals, creating decorations and producing natural jewellery.

Life in a Village

The programme is inspired by the life and traditions in Velké Karlovice, a long time ago. You will get to know crafts, everyday life of the dwellers of a Wallachian cottage and on a farmstead. You will see what animals were bred and what crops and plants were cultivated.

Surviving in Nature

You and your kids learn how to orient yourselves in an unknown terrain together, how to use first-aid procedures, knowledge in camping, start a fire, get water, prepare simple meals from the gifts from the forest or solve crisis situations.

Nature and I

The goal of this programme is to learn a reliable attitude to the nature and its precious resources, and also building a positive children's relationship to the environment.
